TRY OUT THESE LINK FOR SOME INTERESTING SITES

<http://www.programmersheaven.com>

The www.programmersheaven.com site provides good articles on .NET. It contains top articles on VC++ .NET, ADO .NET, Web Services, Managed C++, etc.

www.filelibrary.com

The www.filelibrary.com is a good site with a file search utility that contain lots of downloads, freeware, software, etc. It provides up-to-date information on Windows, DOS, Networking, Internet etc.

www.vbexplorer.com

The www.vbexplorer.com site is dedicated to the novice VB programmers. It includes plenty of tutorials, sample programs, source code, tips etc.

www.codeproject.com

The www.codeproject.com contains articles, source code and demo projects on .NET languages like Managed C++, C#, VB .NET etc.

www.drivershq.com

The www.drivershq.com site provides the driver files for all those drivers you can think of.

www.Gamedev.net

The www.Gamedev.net site provides good articles on various topics like game programming, Graphics, OpenGL, etc.

www.c-sharpcenter.com

The www.c-sharpcenter.com site provides articles, source code and tips on C# and .NET technologies.

www.1001tutorials.com

The www.1001tutorials.com site provides tutorials on almost all programming languages like C, C++, VC++, VB, C# .NET etc.

www.1cplusplusstreet.com

The www.1cplusplusstreet.com site provides good articles on C++. It also gives source code, tutorials on C++.

www.maxcode.com

The www.maxcode.com site provides various articles on programming languages like C, C++, VC++, VB, etc. It also contains the source code, programming tips and tutorials.

www.Csharphep.com

The www.Csharphep.com, a good site that provides a help board for C#. It contains links for articles on C# and .NET technology, C# tutorials and source code.

www.mindcracker.com

The www.mindcracker.com site provides free source code, tutorials, articles, and discussion forums for C++, VC++, MFC, ATL, COM, STL, etc. It also contains good articles on VC++ .NET.

www.webopedia.com

The www.webopedia.com is an online dictionary for computer and Internet technology. It provides various categories of topics like Operating System, Network, Multimedia, Data Structures etc. for the terms you want to search for. It also provides links for the specified term.

www.knowledgeisland.com

The www.knowledgeisland.com site is a treasure for computer learners. It provides free computer tutorials on a variety of topics like Internet Technologies, Operating Systems, Hardware etc. The programming languages covered include, C, C++, C#, VBScript, Unix, Java, JavaScript etc.

www.anydownloads.com

The www.anydownloads.com site provides various categories of downloads like source code for C++, Java, etc., Internet tools, network solutions, text editors, utilities and many more.

www.syncfusion.com

The www.syncfusion.com gives information about the .NET products, downloads and other essentials of .NET

www.csharpcorner.com

The www.csharpcorner.com site provides excellent information on .NET languages like C#, VB .NET etc. It provides latest articles on .NET technology and source code for C#.

www.vbcity.com

The www.vbcity.com is the site where Visual Basic lives! This site offers articles, tips, source code samples, online books and other material on VB and VB .NET.

www.codebeach.com

The www.codebeach.com site provides source code and tutorials C++, C#, Java, JavaScript, ASP, ColdFusion, Delphi/Kylix, Palm, Perl, PHP, Pocket PC, etc.

www.csharptoday.com

The www.csharptoday.com is the site for the learners and developers who are enthusiast to know about latest developments in .NET. This site with its full focus on .NET applications, provides articles, tips, source code and solutions to the C# developers.

www.com

The www.planet-source-code.com site provides articles, tutorials and source code on programming languages like Visual Basic, C, C++, SQL, Java, etc.

www.driverzone.com

The www.driverzone.com is for those who wants to know about device drivers. It provides all sort of information about CD-ROM drivers video drivers, modem, sound cards, etc. You can find information about an obsolete or hard-to- find drivers in the driver archive section of the site and can even download the required driver files.

www.whatis.techtarget.com

The www.whatis.techtarget.com site, is an online encyclopedia that provides definitions for thousands of the most current IT-related words. The categories covered are Computer Fundamentals, Software, PCS, Hardware, Internet, Networking, Telecom and many more.

www.programmingpages.com

The www.programmingpages.com site provides lots of quality information on computer programming. It also provides links for number of good sites on computer programming and other computer related technologies.

www.com

The www.beyondlogic.org

www.visualbasic.about.com

The www.visualbasic.about.com gives a comprehensive collection of weekly features, source code and tips to help Visual Basic developers.

www.csharpcomputing.com

The www.csharpcomputing.com site that provides tutorials on C# and XML.

www.development.freesevers.com

The www.development.freeservers.com offers a directory of programming tutorials, source code, programs, tools, links, games, articles, tips, and FAQs.

www.glenmcl.com

The www.glenmcl.com provides extensive tutorial information on the C++ language. It provides programming tips, articles on C++. It also provides tutorials and articles on Java.

www.easycsharp.com

The www.easycsharp.com site is a newsgroup. A good site for the learners and developers who are keen to know about the new language C#. It provides tips, source code, articles, links and downloads for C#.

www.bugnet.com

[bugnet.com](http://www.bugnet.com) is world's leading supplier of software bug fixes. It has fixes for number of bugs in e-mail systems, browsers, Windows2000 server, Lotus notes, networking and several other topics.

www.erpcentral.com

Visit www.erpcentral.com for information on technologies like ERP and SAP. It provides information through articles and newsletters. It also contains ERP resources, SAP resources, Oracle resources, etc.

www.Visionx.com

The site www.Visionx.com contains good stuff like source codes, tips, FAQs, etc. for MFC professionals.

www.tucows.cows.net

The site [tucows.cows.net](http://www.tucows.cows.net) makes available few top softwares that we use often for free downloading. The softwares include WinZip, media players, graphic softwares, etc.

www.c-sharpcorner.com

Visit www.c-sharpcorner.com for various C# projects. It contains basic as well as advanced source codes.

www.codeproject.com

www.codeproject.com gives a quick introduction to .NET, Managed C++, WebServices using C++ with managed extensions. Also includes source code for managed c++ programs.

www.networkmagazine.com

www.networkmagazine.com is a complete information resource for all communication professionals. It contains in-depth news, analysis and articles and latest technology solutions.

www.componentone.com

www.componentone.com is a gallery of charts. It provides various types of 3D and 2D charts and also the facility of rotating, zooming and scaling charts. The site has number of demos with source code.

www.logicdata.com

Visit www.logicdata.com for technical support, IT services, latest news and software downloads.

www.codebeach.com

Visit www.codebeach.com for source code in languages like C++, Java and also in various tools like ColdFusion. Also find tutorials, books and source code in VB, ASP, JScript, etc.

www.stingray.com/Csharp_faq

Visit [stingray.com/Csharp_faq](http://www.stingray.com/Csharp_faq) for latest information on .NET and C#. It also includes C# FAQs and expert's opinion about .NET and C#.

www.gamedev.net

www.gamedev.net is an interesting site containing game programming/development tutorials, articles, and other resources.

www.planet-source-code.com

Visit www.planet-source-code.com to find source codes in 7 languages including C, C++, Java, ASP, VB, etc. Also find good articles and tutorials in this site.

www.vni.com

www.vni.com is a site for mathematicians. It contains the various mathematical methods. It also provides technical support and business solutions based on the data analysis. Tools for visual data analysis are also available.

www.devx.com

devx.com is a mecca of developers working in ASP, C++, Java, XML, VB, etc. The site provides varied information on these topics including articles, algorithms, free source code, tips, free updates and what not.

www.csharp-station.com

If you want free C# source code, tools and articles visit www.csharp-station.com. It also contains various books and discussion related to C#. You can also download free Beta 2 version of .Net Framework.

www.programmersheaven.com

The www.programmersheaven.com a good site for the learners of .NET. It contains lots of applications developed in VC++ .NET and Managed C++. It also contain articles on topics like .NET, Interoperability in .NET etc.

www.csharptoday.com

www.csharptoday.com is a site for C# professionals created by the Wrox press. It contains all the stuff related to the cutting edge technologies like ASP.NET, VB.NET, C# news and free articles.

www.microsoft.com/windows/embedded

www.microsoft.com/windows/embedded is a web page that lists the Windows Embedded family of operating systems including Embedded Windows CE, Windows NT, etc. Visit this site to learn how these embedded technologies can be used to scale to a broad range of intelligent devices—from small, battery-operated devices to large-scale, mission-critical, dedicated server appliances.

www.intelligenterp.com

Visit www.intelligenterp.com to discuss business software strategies and improve business decision-making and enhance business performance.

www.wirelessdevnet.com

The Wireless Developer Network is an on-line community for information technology professionals interested in mobile computing and communications. The site provides high-quality technical information, news, industry coverage, and comments on wireless networks.

www.buildyourpc.com

www.buildyourpc.com is a site useful for PC buyers. It contains all the latest information like new hardware products, prices and hardware tips.

www.omg.org.com

The [omg.org.com](http://www.omg.org.com) is responsible for defining CORBA. Visit this site to find the specification of CORBA.

www.codepile.com

Visit www.codepile.com for unique tips in VC++. You can also get help on any API with suitable example. The tips work on Win9x/Win NT/Win2000.

www.alphaworks.ibm.com

www.alphaworks.ibm.com is a site by IBM especially for new technologies. It contains number of tools, XML for C++, XML Parser for Java, Bluetooth for Palm, to name a few, which you can download or license.

www.c.ittoolbox.com

The www.c.ittoolbox.com has got a collection of C++ programs, tips and articles. It also provides latest information on .Net technology, C# and Managed C++.

www.Cprogramming.com

The www.Cprogramming.com site contains ample of C++ tutorials, programming articles, graphics tutorial, etc. where you can test your programming knowledge.

www.cshrp.net.com

The www.cshrp.net site is for the learners and developers who are keen to gather latest information on C#. The site provides articles on different concepts of C# language, source code for the programs, news, book reviews and more ... on C#.
